PROFESSIONAL SUMMARY

Data Scientist and MS Data Science candidate at UNT (GPA: 3.9) with 3+ years at Infosys delivering end-to-end AI/ML solutions from RAG/GenAI co-pilots to cloud-deployed models on AWS and Azure for enterprise stakeholders. Skilled at translating ambiguous business problems into measurable, data-driven frameworks, with impact including 40% faster processing, 65% higher reporting efficiency, and validated model accuracy improvements, paired with a consulting approach.

SKILLS

- **Machine Learning & Deep Learning:** TensorFlow 2, PyTorch, Keras, Scikit-Learn, Transformers, LSTM, RNN.
- **Generative AI & LLMs:** RAG Frameworks, Lang Chain, Prompt Engineering, Fine-Tuning, Model Evaluation, Claude.
- **Data Engineering:** Python 3, Java, C++, SQL, Spark, Hive, Hadoop.
- **Cloud & MLOps:** AWS (S3, SageMaker), Azure ML, Azure OpenAI Service, GCP, Git, Docker.
- **Analytics & Visualization:** Looker, Tableau, Power BI, Pandas, NumPy, Matplotlib, statsmodels.
- **Statistical Modeling & Experimentation:** Regression Analysis, Hypothesis Testing, Statistical Significance Testing, Hyperparameter Tuning, Cross-Validation.

EXPERIENCE

Optiu.ai | ***AI Engineer Intern*** ***June 2026 - Present***

- Built and version-controlled Python-based integrations with the Groq API using Git, supporting rapid iteration on agentic workflows within the OptiU Platform SDK.
- Engineered end-to-end LLM-driven workflows including forecasting, optimization, and deal-closing agents supporting 5-6 SMB clients on the OptiU AI platform, covering data ingestion, statistical analysis, automated testing, and deployment.

University of North Texas | ***Math Lab Tutor*** ***Feb 2026 - Present***

- Deliver one-on-one and group tutoring in Probability & Statistics, Linear Algebra and Calculus the mathematical backbone of data science achieving >80% student success rate.
- Translate complex quantitative concepts into accessible frameworks, strengthening the analytical foundation directly applicable to ML model development and statistical inference to the students.

Infosys | ***Senior Associate Data Scientist*** ***2021 - 2024***

- Co-engineered RAG-based GenAI co-pilots extracting insights from unstructured enterprise documents, integrating SAP via Java workflows and Spark/Hive/SQL pipelines, and validating output accuracy against ground-truth benchmarks for enterprise stakeholders.
- Engineered Python/SQL pipelines processing insurance policy and claims data, enabling faster underwriting and risk decisions across teams and cutting data processing time by 40%.
- Optimized critical workflows saving 8–10 minutes per task across 1,000+ daily transactions, improving operational efficiency across cross-functional teams.
- Built Tableau dashboards improving reporting accuracy by 30% and cutting stakeholder report production time by 65% via automated data pipelines using Scikit-Learn and AWS.
- Spearheaded AI solution development for international projects, earning 2 INSTA Awards while accelerating delivery through Agile sprint planning and on-site client collaboration.

PROJECTS

- **Scalable Ride-Sharing Database System** **https://github.com/MohammedAbdulRub/rideshare_platform**
  Designed a normalized relational database schema with constraint-based business rules to optimize end-to-end ride-sharing operations such as booking lifecycle, secure payments, and feedback using analytical SQL queries supporting 10K+ simulated ride transactions. **Tech: SQL, MySQL, RDBMS, Constraint Modeling.**
- **Healthcare Claims Outcomes Analysis**
  Conducted multidimensional analysis on 1,000+ insurance claims records from Kaggle to identify trends in claim outcomes, denial reasons, and payment patterns, designing Tableau dashboards that informed a 20% reduction in claim denials and surfaced disparities to guide more equitable risk and revenue-cycle prioritization. **Tech: Python, Tableau, Pandas.**
- **Human Activity Recognition using LSTM**
  Built and tuned an LSTM/RNN-based classification model processing accelerometer and gyroscope data, optimizing hyperparameters(learning rate, sequence length, dropout) to achieve ~93% accuracy. **Tech: Python, TensorFlow/Keras, Scikit-Learn.**

EDUCATION

- **University of North Texas** Master of Science | Data Science | GPA: 3.9 **Dec 2026**
- **Osmania University** Bachelor of Engineering | Computer Science & Engineering **2020**
